

Airline Safety

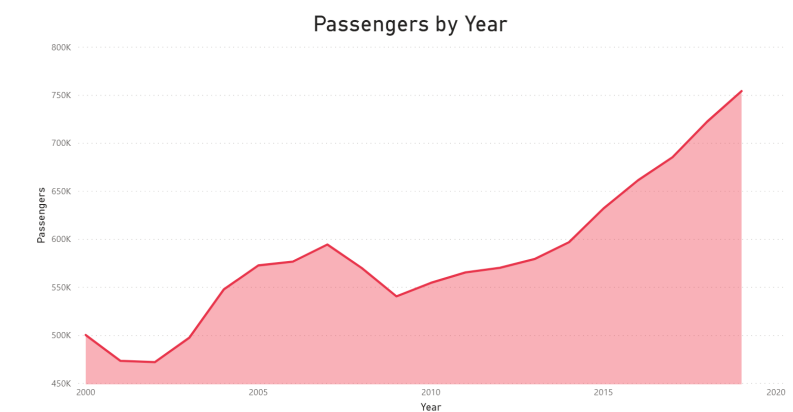

Did you know....

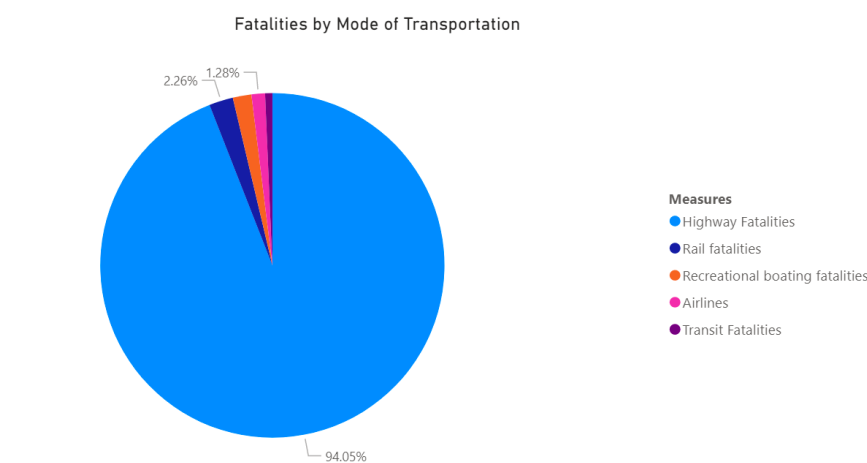

Passenger flight fatalities have steadily decreased since 2000

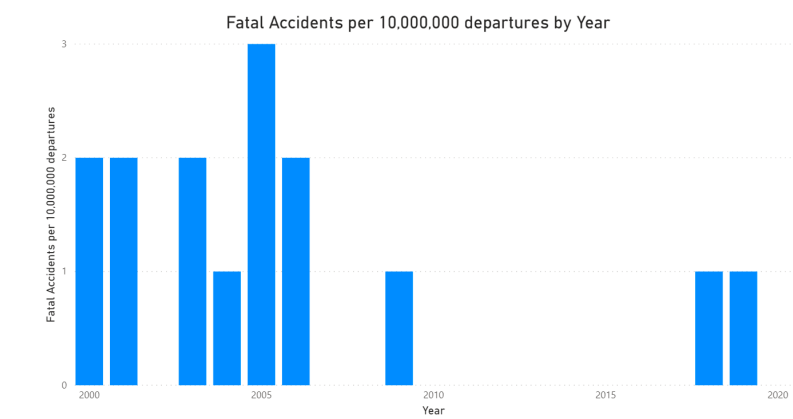

....and in that time, passengers traveling has continued to increase

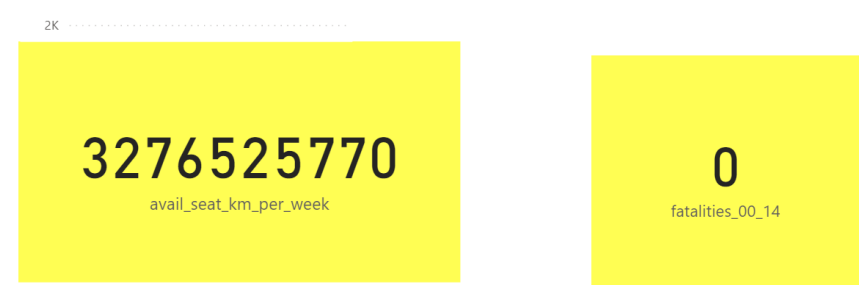

Airline fatalities only account for 1.28% of transportation fatalities, compared to 94.05% for highway fatalities

In the last 20 years, fatal accidents per 10 MILLION departures has only been between 0 and 3 (and was only 3 once!)

Southwest Airlines has over 3 BILLION available seat km per week, and had ZERO fatalities between 2000 and 2014

Compared to other North American airlines, Southwest is about in the middle for seats and lower than several other airlines for incidents and fatalities

Available Seat KM, Incidents and Fatalities by Airline							
airline	avail_seat_km_per_week	fatal_accidents_00_14	fatal_accidents_85_99	fatalities_00_14	fatalities_85_99	incidents_00_14	incidents_85_99
Delta / Northwest*	6525658894	2	12	51	407	24	24
United / Continental*	7139291291	2	8	109	319	14	19
